

CS72U/CS74U

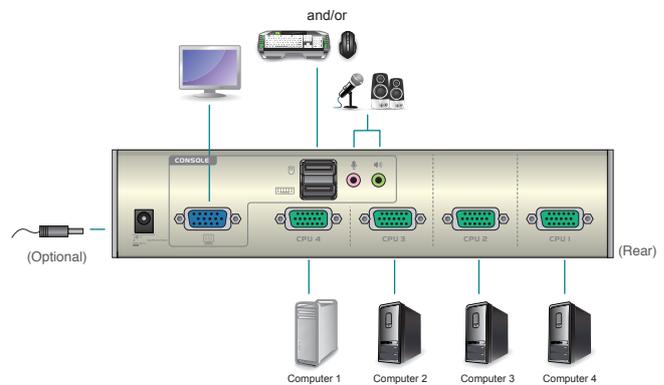

2/4-Port USB KVM Switch

The CS72U / CS74U 2/4-Port USB KVM Switch is a desktop control unit that allows users to access two or four computers from a single KVM console (keyboard and mouse, audio and VGA monitor).

With the CS72U / CS74U, you can access computers conveniently using port selection pushbuttons located on the unit's front panel.

Setup is fast and easy; simply plug cables into their appropriate ports. There is no software to configure, no installation routines, and no incompatibility problems. Since the CS72U / CS74U intercepts keyboard input directly, it will work on multiple computing platforms.

Setup

Features

- One VGA console controls two (CS72U) or four (CS74U) USB VGA interface computers
- Computer selection via front panel pushbuttons
- Multiplatform support – Windows, Linux and Mac
- Audio Enabled – full bass response provides a rich experience for 2.1 channel surround sound systems
- Superior video quality – 2048 x 1536; DDC2B
- Supports USB hot-plugging
- Non-powered

Specifications
